Risk analysis dashboard

This dashboard summarises the results of the cyber-risk analysis of CYBERCORP performed by the tool.

The first table presents a ranking of the options that are available with your budget of 650 VC and their total costs in case of CYBERCORP suffering a cyberattack or not. **The available options have been ordered from best (option 1) to worst (option 6)** according to their expected utility for companies that are similar to CYBERCORP.

By clicking in each option of the ranking, you can get additional information on the total costs of this option. This information can help you to improve your cybersecurity decisions and increase the profits of CYBERCORP.

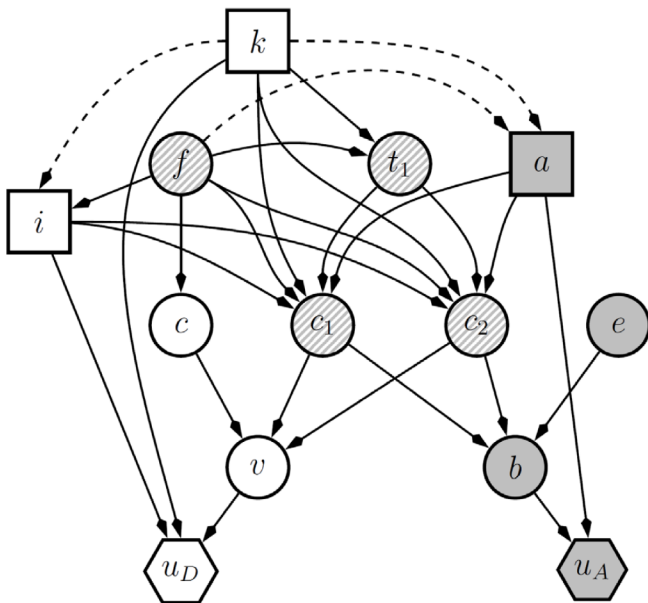

Notice that **the total costs include the price to be paid for the purchases and the losses on the value of the assets of a potential cyberattack.**

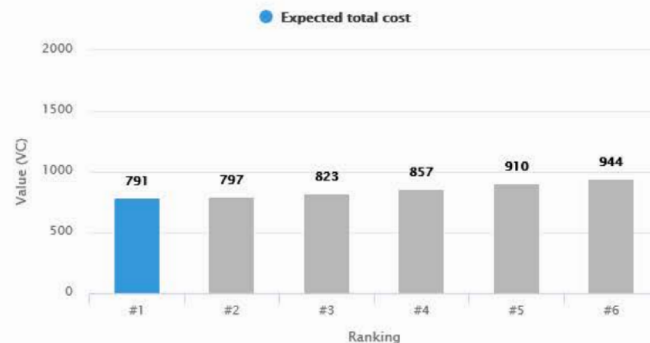

Based on the results of the cybersecurity analysis performed with this tool, our experts recommend you implement the first option in the ranking. This option includes to purchase Basic security Measures and contract Premium Cyber-Insurance.

You can purchase the recommended products using the on-click button from the risk analysis dashboard.

[Purchase this option](#)

Ranking	Security measures	Cyber-insurance	Expected total cost
1	Basic	Premium	791 VC
2	Advance	Premium	797 VC
3	Basic	Basic	823 VC
4	Advance	Basic	857 VC
5	Basic	None	910 VC
6	Advance	None	944 VC

Showing 1-6 of 6 items.

Purchase option #1.
